(puzzle seam on wide sides and on one long side)

4 sides with puzzle shaped edges -

length x width:

170 cm x 125 cm

Scraper manure removal on rubber flooring has already been proven in practice:

In principal we recommend the use of **scrapers specifically developed for rubber floors.**

For structural alterations it is necessary to **adapt the scraper facilities** in coordination with the scraper manufacturer, according to the KRAIBURG guidelines for manure scrapers.*

Important: check the scraper at least once a year and grind off the sharp edges!
